EMPLOYERS WHO HAVE LONG-COVID

prepared by employees for employees

The Issue

Employers who have covid are a pain in the butt. They make our employee lives difficult. So we have created this guide...

Top 5 Symptoms

1. **Grumpy**
2. **Tired**
3. **Forgetful**
4. **Indecisive**
5. **General pain in the arse**

How to Manage your Boss

1. **Make them work from home** (keep them well away)
2. **Have meetings in the morning** (whilst they are still switched on)
3. **Get decisions made in the morning** (see point 2)
4. **Tell them to leave you alone** (it's for your own benefit not theirs)

Insider guide to getting a pay rise

This is the time to strike - whilst they are at their weakest!

- **Wait until late afternoons** (when they are at their lowest)
- **Be solution driven** (its a great bluff)
- **Tell them you are making their life easier** (of course you are!)
- **Tell them you are helping their rehab** (uhu... sure...)
- **Tell them its only going to cost ~~$5k / year... $416 / mth~~... $96 per week** (sounds way better)
- **Lastly, tell them you've already set it up because you are solution driven** (it's the least you can do!)
